

Southeast Louisiana Flood Protection Authority - East

Request for Qualifications to provide Hazard Mitigation Assistance Services for the SLFPA-E

Addendum No. 1 **September 23, 2020** **Questions / Answers**

- Q: Is this construction services or more consulting related?
- A: This is for consulting services to assist us with grant applications and management of any grants awarded. We hope it will help us win some grants which would then become construction projects.
- Q: The RFQ states, "The selected consultant will provide Grant Application and Grant Management services at a negotiated price when and if federal funds are awarded to the FPA." Does this mean that no task order will be issued unless and until FPA is awarded a grant or do you foresee a task order to assist with application preparation? Since the first bullet in the SOW is Work with FPA staff to prepare timely HMA/BRIC grant applications and since an award cannot be made without an application, we wanted to clarify that some scope and fee would be available to support application preparation services.
- A: Yes, there will be no task orders issued unless and until the FPA is awarded a grant. Consultant's fee will be a percentage of the grant amount awarded.
