Runoff Control Work to Begin in East Jefferson

June 2, 2021

Jefferson, LA – The East Jefferson Landside Runoff Control Improvement Project will begin on June 7th for Reaches 2-5 in an effort to protect properties from rain runoff.

Project Details:

Project Name: EJ Landside Runoff Control Improvements – Reach 2-5

Project Location: EJ Lakefront – Duncan Canal to Jefferson/Orleans Parish Line

Contractor: Shavers-Whittle Construction, LLC

Project Cost: \$321,416.50

Project Length: June 7, 2021 to September 5, 2021 (90 Calendar Days)

The FPA-East has received complaints from residents over the last couple years regarding rain runoff getting into their backyards and not being caught by the berm and drainage system that runs along the property line. The work entails placing fill and/or excavating in certain areas to improve the drainage behind the residents' properties. Please note, the contractor will be videotaping properties along the lakefront to document pre- and post-construction conditions. They will **NOT** enter private property. This project will improve drainage off of the levee system and reduce the chance of runoff from entering private properties.

Residents who have questions should email Ryan Hathaway at rhathaway@floodauthority.org
